BRINGING YOUR VISION TO LIFE

VISIONS REALISED IN GLASS

Steel, stone, wood, brick, slate...

There's no shortage of potential material choices for the architect, specifier, interior designer or discerning homeowner looking to create an impressive and unique structure. But none of these materials can ever compare to glass.

Glass creates a feeling of light and space. It gives an unrivalled viewpoint on the drama of the world outside – whether that's a brooding night sky or a busy city street. And it enhances the mood and lifts the soul.

And, if you're considering a glazed structure for your next major project, few companies are better placed to meet your needs than K2 architectural systems.

A COMPLETE SOLUTIONS PROVIDER

K2 architectural systems is part of the £multi-million Burnden Group plc – a globally operating provider of engineering and construction related products and services. The groups in-house extrusion division enables us to exercise total quality control over the complete manufacturing process and shorten the supply chain. In addition our dedicated R&D department ensures that product developments make their way from the drawing board to the marketplace in the quickest possible time.

Being part of this group gives us access to considerable expertise and resources. It enables us to provide complete solutions to your project needs. Specifically, K2 architectural systems can:

- Provide budget or detailed costings for your project
- Create scheme or full drawings and specifications
- Specify, manufacture and supply quality assured products
- Construct and manage the project to completion

Our one-stop shop capability gives you the benefit of one single point of contact and one consistent level of quality throughout. Alternatively, if required, we can dovetail our services with those of other suppliers and contractors. The choice – and the flexibility – is yours.

SOLUTIONS SET ON SOLID FOUNDATIONS

At the heart of K2 architectural systems' ability to meet your needs is a range of superior products. Engineered to excellence from the ground up, every component of every system has been intelligently designed and rigorously tested to ensure ultimate levels of quality, performance and aesthetic appeal.

We use aluminium as the backbone to our structures due to its strength, versatility, lightweight nature and resistance to the elements and PVC-u for its insulating properties.

What's more, our systems can be tailored to your own specific requirements, and are complemented by a variety of ancillary products and glazing – including our own high performance glass. Plus, as all components are produced 'in-house', we can monitor and maintain standards at every stage.

OFFERING YOU A BLANK CANVAS

With K2 architectural systems, you have the freedom to use your imagination. Thanks to the versatility of our products and the considerable experience of our team, we are able to create structures of a truly individual and highly creative nature. A fact perhaps best demonstrated by the images shown here.

DISCOVER THE LIMITLESS POSSIBILITIES

Limited clearances. Unusual shapes. Exacting specifications. Ornate or intricate styling. There are all sorts of reasons why you might think the use of a glazed roof for a particular application is unpractical. However at K2 architectural systems, we specialise in making the seemingly unachievable achievable and have a long track record of delivering solutions to even the most complicated briefs.

DELIVERING OUTSIDE VIEWS

WITH INSIDE COMFORT

Whether you're thinking university style quadrangle or stately courtyard, entrance canopy or playground, K2 architectural systems can help you turn these areas and many more like them in to all year round, all weather spaces. Through the addition of a glazed roof, the area is protected from the elements but without sacrificing on the sense of freedom and levels of light that come from being in the open air.

EXCELLENCE AT ANY LENGTH

As well as creative roofs, complicated roofs and roofs designed for enclosed spaces, K2 architectural systems can provide a full range of large span solutions. Maybe you're thinking about utilising glass to create an airy swimming pool enclosure. Perhaps you'd like to use glazing as the basis of an extension to a commercial premises such as a pub or a restaurant. Whatever your requirement, we have the ability to meet your needs – and in a way that exceeds every expectation.

IMPRESSIVE DESIGN AND TECHNICAL CAPABILITIES

In the past using a glazed roof meant a limited design choice. K2 architectural systems however changes all that and through our extensive product portfolio we can offer you an impressive degree of design freedom. As part of this, you have the following options:

Colour

- Full RAL and British Standard paint ranges
- Unique golden oak, rosewood, green and mahogany wood grained foils

Glazing

- 16, 25 & 35mm polycarbonate
- 24mm sealed glass units

Roof Pitches

- Mono 5° – 37.5°
- Duo 17.5° – 37.5°
