## PULL CORD MOTOR AS STANDARD

Cord Release for easy manual access without the need to carry crank handle

Crank handle override system difficult to use and can cause damage by over winding.

# Birkdale Excelsior MINI insulated roller garage doors.

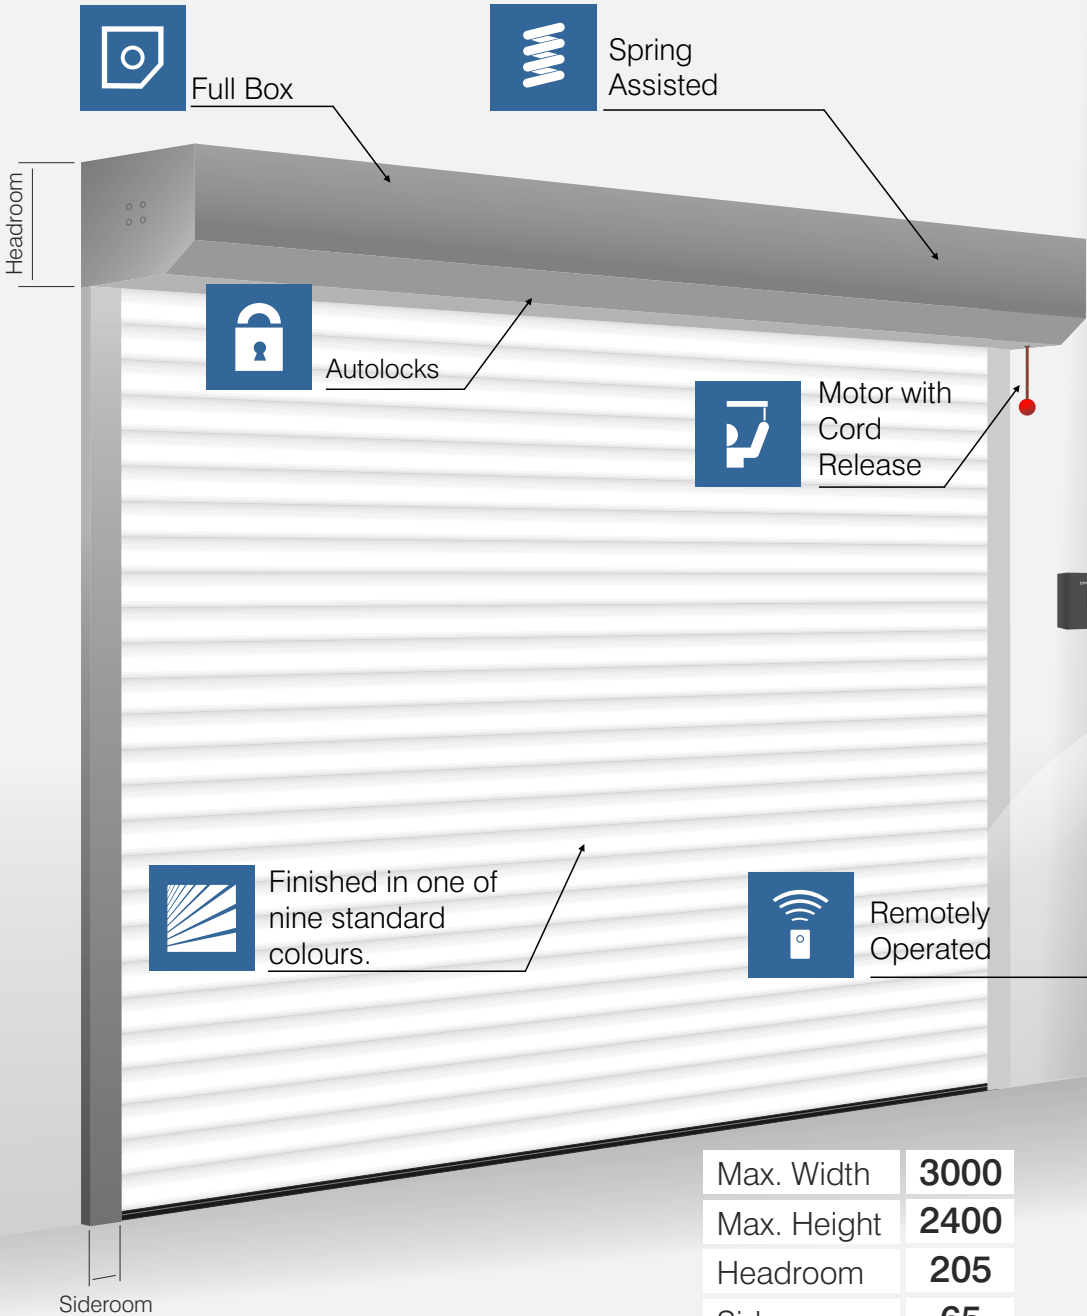

Manufactured in our UK factory, the Excelsior Roller Door is a convenient, space saving, secure, safe, reliable door with a great 'kerb appeal' and is a wise choice.

The Excelsior Roller Door has a unique system feature within. If there is a power cut or for some reason your garage door has stopped working, the Excelsior Roller Door uses a cord release. For manual operation just pull the cord and move the door by hand with the aid of our spring assisted drive system. The door glides up and down easily and automatic operation is re-engaged by simply pulling the cord once more.

The roller door curtain is made of aluminium profiles filled with high density foam for greater strength and improved insulation, when compared to commonly used aluminium foam filled profiles.

All types of insulated roller doors made by Birkdale use high density foam filled profiles.

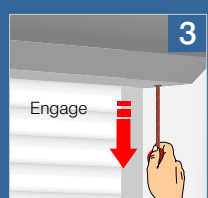

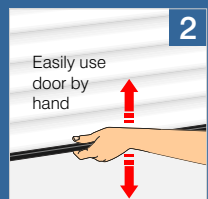

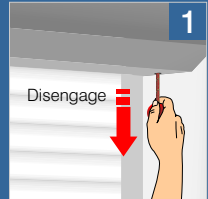

The Excelsior Mini roller door can save you considerable space inside your garage and will match any security requirements. Our door needs minimal side room giving you more drive through width. Roller doors open vertically so you can park your car close to the door and it will still fully operate, this is ideal for short driveways and limited garage length.

Max. Width	3000
Max. Height	2400
Headroom	205
Sideroom	65

## Need to open manually ?

No problem just 3 easy steps

## Motor with Cord Release

In the event of a power cut, just pull the cord and operate the door by hand with our spring assisted drive system.

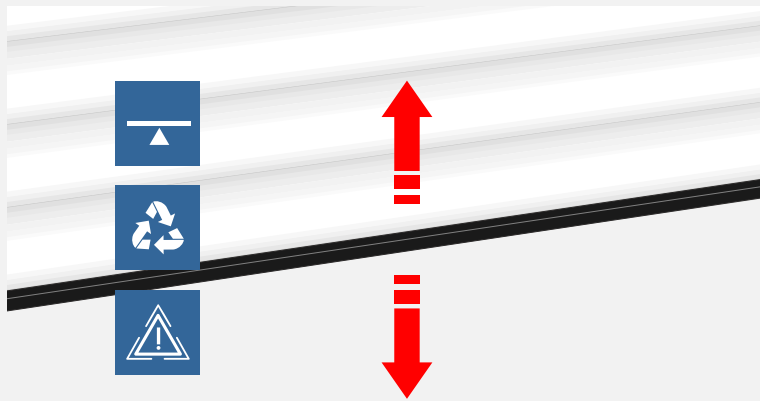

## Secured with Autolocks

The Roller Door has built in autolocks. When the door is closed a spring clamp device holds the door down tight.

## Nine standard finishes

Our standard paint finishes includes: Pure White, Grey Brown, Jet Black, Steel Blue, Anthracite Grey, Carmine Red, Light Ivory, Fir Green and Golden Oak

## Three Function Spring System

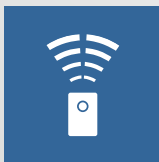

Reduces the work load on the motor, giving a smoother door operation. Provides a built-in anti-drop device.

## Standard Features

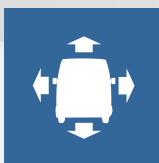

### Powdercoated Finish

Nine standard paint finishes. Includes matching box and guides.

### Remote

Two dual-channel "hold to run" remote controls supplied as standard.

### Space Saving

Gain extra internal storage space and in many cases, extra drive through space.

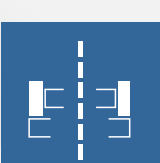

### Made of Aluminium

Our Roller Doors are made of aluminium. Unlike steel, aluminium won't rust and looks more attractive.

### Full Box

Finishes the roller shutter off nicely. The Full Box is required for external fitting.

### External or Internal Fitting

Roller Door can be fitted internally, externally, face fixed or in-between the aperture.
